Re: DuPont Chambers Works Facility
PFOA – Fluorinated Compounds at Chambers Works Facility
Pennsville Township, Salem County

Dear Mr. Boettler:

In an effort to better understand the distribution of fluorinated compounds at Chambers Works, the NJDEP requests that DuPont search their ground water monitoring data database and provide the NJDEP with all the historical data for compounds which contain fluorine in their structure. The data should be provided in excel or some other widely used format. The data tables should include the sample date, name of compound, concentration, analytical qualifications on the data, and location of sample. The sample locations should reference wells in the currently used grid system.

If you have any questions, please contact me at (609) 984-4071 (frank.faranca@dep.state.nj.us).

Sincerely,

Frank Faranca, CHMM, Site Manager
Bureau of Federal Case Management
